DyCPOs/WPOs of all Workshops & Construction Units;

**Sub:** Implementation of Modalities of UMID (Unique Medical Identification) (Medical Cards) in Indian Railways.

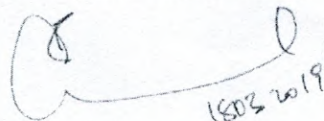

**Ref:** Railway Board letter no. 2018/Trans. Cell/ Health/Medical Card, dt. 04.01.2019.

As per the Railway Board mandate (vide reference above), SCR has developed UMID software for generation of Smart Medical cards for all the units in Indian Railways. With this module, the Employee, Pensioner and all the eligible dependents can be issued with split medical cards. Application for issue of cards should be submitted online only on this module by the serving employees and pensioners. After necessary verification and approval by the administrators, the smart cards will be generated online for printing/viewing/using in Hospitals. Details of the module along with implementation modalities are elaborated as under:

**A) Software Features:**

In accordance with the prescribed guidelines therein, the software has been customized for ready use, as under:

- (i) The Colour Scheme as advised by RB has been incorporated.
- (ii) The Numbering scheme as agreed by RB has been already adopted for unique identification of Beneficiaries across all units in IR.
- (iii) Security Audit has been carried out on the Software.
- (iv) RailTel servers have been hired with adequate security and performance features, along with a mechanism to scale up on need basis.
- (v) Integration of IPAS & ARPAN databases for built-in authentication of the users/beneficiaries has been completed.

  
18/03/2019

In view of above, the software can be operationalised by putting in place the following Implementation Modalities.

## **B) System Requirements:**

### **(i) User Management System:**

Mapping the UNITS & USERS is the most critical requirement of the module without which it is not possible to implement further. Leaving this exercise completely to the units themselves would result in inordinate delay. Therefore, in order to quickly implement the module, the basic level of mapping of UNITS & USERS has been done by the UMID team of SCR (Super Admin) on initial basis. For the detailed guidelines, please refer to the following *Annexures* attached to this letter:

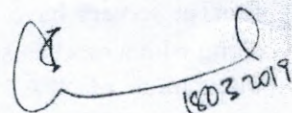

- User Management Guidelines – *Annexure: A*
- Card Administration Roles – *Annexure: B*
- Hospital Administration Roles – *Annexure: C*

### **(ii) Printing Modalities:**

As per the R.B. letter, Zonal Railways may print their Medical Cards at their end or may request SCR to print initially in bulk. In view of above, it is our considered view that the units may exercise the following options:

- a) Though the Software is maintained by SCR, the data is accessible to individual units. Printing of cards and delivery of cards to the beneficiaries can be undertaken by concerned Zonal Railway or units themselves through local agencies with whom they can enter into contract for printing since huge number of cards are required to be replaced in one go and at the same time, issuing of cards can go on for considerably long period.
- b) Or alternatively, SCR can arrange a centralized agency (akin to Rate Contract etc) for printing, on which the zonal railway/unit can place their print orders from time to time to collect the printed cards from the agency and distribute to their beneficiaries directly.

Each unit can choose one of the above methods; and if any unit prefers the option (b), the assessment of number of cards duly accounting Employees, Pensioners & Dependents may be advised to SCR for finalizing the terms of the Tender.

Handwritten signature and date: 18/03/2019

(iii) **Facilitation Cells:**

The existing set-up for processing Medical Cards may not be sufficient to deal with bulk requirement to replace all the existing cards and issue of split cards to all dependents. **Therefore it is advised that a special cell with efficient team may be put in place on temporary basis for quick processing of online applications.** Further, to assist employees and pensioners in filling up of online forms, camps may be organized with necessary IT infrastructure in major establishment units where staff/pensioners are concentrated in large numbers. Units may explore any other methods as they deem appropriate including that of outsourcing/engaging Data Entry Operators etc.

(iv) **Hospital Interface Infrastructure:**

UMID smart cards can be read through **QR code scanners** in the Hospitals for first level validation. And for second level validation on one-to-one basis can be done through Biometrics. Therefore all the Health Units are required to be equipped with **QR and Biometric scanners** in addition to the **seamless internet connectivity, printer** for printing auto-generated OPD slip and **computers**. This can be run either with the Facilitator staff as in the current practice along with the above mentioned devices (or) through **Self-Service Kiosks** (wall-mounted Tabs integrated with Biometrics and QR scanners, Printers & Internet) (or) both in parallel modes. The requirement assessment may be undertaken on Daily Footfall basis, 200 per kiosk per hour and so on or as deemed appropriate. Specifications of the desired gadgets are specified separately in **Annexure:D.**

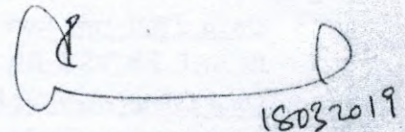

**C) Implementation Modalities:**

- (i) It has been decided to open the module for End-Users (Employees & Pensioners) to Register & Submit their applications in **2 phases**:
  - o **On a Pilot run** from 21.03.2019 for ADI & SUR Divisions, MCF/RBL, IRISSET, RRB/SC, Rly Brd & all Units of SCR.
  - o **On a Comprehensive basis** from 03.04.2019 for all units of Indian Railways.
- (ii) Therefore the entire User-Management should be completed in all respects at the earliest. Each Zonal Railway/PU/CTI/RRB and all special units at UL-I level are requested to kindly **nominate one nodal authority** to coordinate with the UMID Technical team for the smooth & effective implementation of the module. The nominations may be advised to the **undersigned by 25.03.2019** at **umid.helpdesk@gmail.com.**
- (iii) Each unit should **publicise to the beneficiaries** (Employees and Pensioners) that the UMID portal is open for submitting online applications for issue of Medical ID cards.

  
18/03/2019

- (iv) **Hospital Admin credentials** are assigned to PCMDs of respective zonal jurisdiction who in turn can map Health Units & further assign Roles & Rights to the Users [Please refer Annexure: C].
- (v) **Units** which are **not on-board on IPAS and ARPAN** will be covered in due course which will be separately notified. Because integration/bridging of their databases with UMID is yet to be finalized.
- (vi) Biometrics capturing can be undertaken either simultaneously through Facilitation centers or at subsequent stages since this requires specific hardware at End-User disposal. This can be done through Hospital Admins at the time of availing Health Services at later stages by the Beneficiaries. Or it can be covered by special facilitation centers in the field units or Divisional offices at subsequent stages. Till all the Beneficiaries are registered with their Biometrics, the second level authentication through **Biometrics in Hospital Interface will be made optional**.
- (vii) Since it will take quite some time to fully cover all the employees and pensioners, the Hospital Admins should allow **existing RELHS cards parallel to UMID cards** in the Hospitals without restriction for some time duly educating the dealing hospital staff so as to avoid any inconvenience to the genuine medical beneficiaries.
- (viii) However on a pragmatic consideration, **it is indicated that this entire process can be completed in 3 to 6 months**. Hence exclusive usage of **UMID Cards & Biometric validation** will be made **compulsory from 01.10.2019**. Accordingly necessary preparations need to be undertaken by the respective units.
- (ix) The detailed Guidelines in the form of **User Manuals** (for both Admin Users and End-Users), **Registration & Log-in Modalities, Brochures, Check-lists, Application Formats, Help-Desk Modalities, FAQs** including educative **Videos** in multiple languages can be seen in the Home page of UMID portal at **<digitalir.in/umid>**.

Enclosures: Annexures A-D (12 pages).

DyCPO/Co-Ord/SCR

For Principal Chief Personnel Officer

C/: DG/RHS, Rly Brd, NDLS – for kind information please.

C/: ED/Estt/NG, Rly. Brd, NDLS – for kind information please.

C/: ED/S&T/Transformation, Rly. Brd, NDLS – for kind information please.

Annexure: A

User Management System: Guidelines

Units and Users along with Roles and Rights are required to be mapped in the module as a first step of its implementation.

## (i) Workflow:

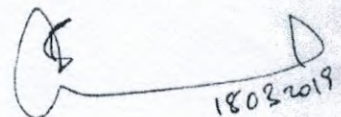

Steps	User	Process
1	Employee/Pensioner	Registers and Submits Application
2	Coordination Clerk (Establishment/Settlement)	Receives and Distributes Applications
3	Establishment/Settlement Clerk	Verifies and Recommends
4	Establishment/Settlement Officer	Card is automatically generated, once Approved

## (ii) Units Management:

There are 3 levels in the Units Management:

SN	Level	Unit Level	Units Description
1	UL-1	<b>Zone Like Units*</b>	All Zonal Rlys, Rly Brd, CTIs, RRBs, PUs, & other Units such as NF/Const, COFMOW, RDSO, CORE etc are treated as independent Zonal level units
2	UL-2	<b>Administrative Field Units*</b>	Within Zonal level units, the Divisions, Workshops, Zonal HQrs Unit, ZRTI, Construction unit etc are treated as independent Field Units.
3	UL-3	<b>Cadre Functional Units * #</b>	The level at which the cadre functionalities especially Medical Card processing function is independently handled such as Accounts, Security cadres, Common Cadres (handled by Personnel Department), etc.

# Finance and Security departments in most of the units are taken to be independent Cadre Functional Units (at UL-3) since their SRs, and Settlement records besides the cadre functionalities are maintained separately. Along the same lines all the cadres that are handled by Personnel department will be treated as one independent functional unit. This is a broad & common way of functioning in most of the units. However, practically there can be different ways of functioning in different units. Hence the Cadre Functional Unit is to be treated as a customized unit to be operated as per the local practices at the field level. In a way there can be 3 cadre functional units as above, (or) only one common cadre functional unit all under Personnel department, (or) there can be more than 3 cadre functional units such as Stores unit, Printing Press unit etc. Therefore this mapping of functional units is left to the Field Unit concerned to define as per their working practices.

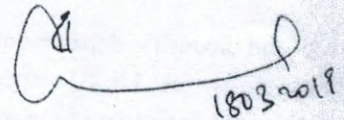

\* The mapping is done by Bill-Units as in the IPAS Architecture. A basic level of mapping is already completed as per the NORMAL structure elucidated as above: Zonal Units (UL-1), Field Units (UL-2) & Functional Units (3 Types at UL-3). Further customization can be done by the respective Unit Admins on their own by segregating or merging or transferring the bill-units from one unit to other.

(iii) **Users Management:**

Each unit needs to be mapped with one Admin User who can act as a System Administrator for assigning Functional roles to rest of the users. Broadly, following levels of users are reckoned in the module:

User Type	User Level	Users	Functions
System Admin	SL-1	Super Admin	Creates Zone Like Units and assigns Admin Rights to Zonal Unit Admins.
	SL-2	<i>Zonal Unit Admin (UL-1)</i>	Maps the Administrative Field Units by Bill Units and assigns the Role of Divisional Unit Admins.
	SL-3	<i>Field Unit Admin (UL-2)</i>	Maps Cadre Functional Units and assigns Admin rights to Users.
	SL-4	<i>Functional Unit Admin (UL-3)</i>	Assigns Functional Roles to Users.
Functional Admins	SL-5	<i>Coordination Clerk</i>	Receives all the applications and sorts them by departments/designations/bill-units etc and distributes them to the Dealing clerks for verification.
	SL-6	<i>Establishment Clerk</i>	Verifies the applications and Recommends for Approval.
	SL-7	<i>Establishment Officer</i>	Approves the application for generation of Medical Cards.
End-User	SL-8	Beneficiary	Submits Application for Medical Card.

\*\*\* The credentials of these users could not be generated due to technical issues. Hence, these users are requested to consult their respective Zonal Admin (UL-1) or Unit Admin (UL-2) as indicated above.

 18/03/2019

Annexure: C**Roles Management: Hospital Administration Roles**

For Hospital/Health Unit administration, the roles are to be defined. Initially all PCMDs are assigned with the Admin Rights at Zonal level as **Zonal Admin (Medical)** who can map the Hospitals and Health Units under their jurisdiction by selecting from the Hospitals Master already deployed in the module. Once the Hospitals and HUs are mapped (in Groups as well as Individually), the same are to be assigned to Officials as **Hospital Group Admin** and **Hospital/HU Admin**. Subsequently the Hospital Admins can add further users within a Hospital/HU as **Hospital Facilitators**. Therefore further level users can be managed through Zonal Admin user account as per the local requirements. The defined Hospital User Management along with log-in credentials is attached hereunder:

SN	Level	Hospital Admin	Process
1	HL-1	<b>Zonal Admin (Medical)</b>	PCMDs as Zonal Admin maps the Hospitals under their jurisdiction and assigns the Admin roles for units (Group/Individual).
2	HL-2	<b>Hospital Group Admin</b>	Can access Reports (eg. Debits/Credits; Age & Gender Profiles; Registered User Profiles etc) for Group of units as a whole. It can be at the level of division; Hospital Hierarchical structure (Hospital with attached units) etc.
3	HL-3	<b>Hospital/HU Admin</b>	Can define Roles for Hospital Facilitators. Can Access Reports for Hospital/HU.
4	HL-4	<b>Hospital Facilitator</b>	Can facilitate validation of User/Beneficiary on one-to-one basis only through facilitation Cell or through Self-Service Kiosks for OPD slip generation & printing.

Technical Specifications of the Hospital Interface Infrastructure

## SINGLE FINGER PRINT SCANNER FOR AUTHENTICATION

Parameters	Specification
Minimum Platen Area	Optical/multispectral/capacitance technology 1. If platen area is 15.24 mm x 20.32 mm or more: 1.1 Provisional certificate would be issued without any field testing; 1.2 Final certification would be subject to sensor-extractor meeting <2% FRR in Aadhaar authentication system (at FAR of 0.01%) for which detailed guidelines will be published by STQC. 2. If platen area is 12.8 mm x 16.5 mm but less than 15.24 mm x 20.32 mm, certification would be subject to sensor-extractor meeting <2% FRR in Aadhaar authentication system (at FAR of 0.01%) for which detailed guidelines will be published by STQC. Any other Technologies 3. <2% FRR in Aadhaar authentication set up (at FAR of 0.01%) would need to be demonstrated. Detailed guidelines and other requirements specific to the technology will be published separately by STQC.
Image quality	Must be listed on "IAFIS Certified Product List" posted on <a href="https://www.fbibiospecs.org/IAFIS/Default.aspx">https://www.fbibiospecs.org/IAFIS/Default.aspx</a> under "PIV Single Finger Capture Devices" OR Lab Test conformance report showing compliance to ISO 19794-4 Annexure A OR any other equivalent conformance report (to be approved for equivalence by expert committee appointed by Competent Authority)
Extractor Quality	<ul style="list-style-type: none"> <li>• MINEX compliance</li> <li>• Number of Minutiae generated by extractor to be in conformance to ISO Specification. Tested for at least 12 Minutiae points generated under test conditions.</li> </ul>
NFIQ Quality Software	Inbuilt NFIQ quality software either at device level or extractor level.
Resolution	Minimum 500 DPI with 5% margin on the lower side
Grey scale/ Image type <sup>pe</sup>	8 bit, 256 levels
Extractor & Image Template Standard	ISO 19794-2 for fingerprint minutiae template and ISO 19794-4 for Fingerprint Image Template
Maximum Acquisition time(Placement to Template)	< 2 secs
Audio/Visual indication	A/V indication either at device level or at application level for indicating various events like: a) Indication for placing finger b) Start of capturing c) End of capturing
Liveness Detection	Preferable
Latent detection	Preferable
Platen	Rugged, minimum IP 54 rating preferable Prefer scratch resistant

1803 2019

Parameters	Specification
	features
Preferred Operating Temperature	0 to 45 degree Centigrade
Preferred Storage Temperature	0 to 50 degree Centigrade
Preferred Humidity	10 to 90%
ESD	>= 8Kv
Environment, health and safety	ROHS certification
Safety	UL or IEC60950 compliance
EMC compliance	FCC class A or equivalent
Operating system environment	Vendor needs to declare the compatible operating system
Connectivity	1. Standard USB connectivity for PC based application. 2. Connectivity for POS devices.
